

John Laing Group plc

Energy and Water Policy

John Laing Group plc is committed to responsible energy management and achieving energy and water efficiency in all areas where we have influence over consumption.

Our Objectives are to:

- Proactively collaborate with our clients and supply chain partners to identify energy and water conservation opportunities and solutions
- Raise awareness of energy conservation and actively promote energy efficiency in partnership with stakeholders
- Regularly monitor reductions in energy and water consumption and seek opportunities to recycle water where possible
- Ensure our assets are appropriately metered to aid energy and water monitoring, and raise awareness of the benefits of additional metering with our clients
- Undertake energy audits on targeted sectors and sites with the aim of promoting best practice throughout the John Laing Group plc portfolio
- Identify and promote sustainable and energy efficient technology for design, installation and retrofit work in all sectors
- Where we have purchasing powers, include the procurement of energy through greener technology wherever possible

Commitment

- Communicate this policy to our staff and our suppliers
- Through a programme of continuous improvement and innovation, we will ensure that we meet, and where, appropriate exceed our applicable legal requirements.
