

John Laing Group plc

Waste Policy

It is the policy of John Laing Group plc to establish and maintain effective and efficient waste management systems that assist in minimising waste production through reduction, reuse and recycling. Wherever possible, waste will be utilised as a resource in order to protect and enhance the environment.

This statement endorses our policy to meet legislative requirements and reduce the costs of any waste management service we are responsible for.

Our objectives are to: -

- Set annual targets for the management and reduction of waste
- Ensure that our suppliers operate their own waste management systems, which we will monitor and review through internal processes and arrangements
- Reduce, reuse and recycle as much waste as possible
- Invest in "Waste into Energy" practices or projects and research into best waste management practices
- Develop metrics to measure success

Commitment

The Directors of John Laing will: -

- Provide the necessary resources to firstly improve, and then maintain waste management systems and development of innovative ideas
- Communicate our waste policy requirements and objectives to all staff
- Ensure that our staff are competent on the basis of appropriate education, training, skills and experience to enable us achieve our waste objectives
